

Walker Electronics Limited are proud to introduce the White Tiger Hurricane Fogging and Sanitising system.

The White Tiger Mobile Sanitising Unit is a fast, reliable and effective sanitising system.

When used with WELsan solution, it quickly kills the SARS CoV-2 virus which causes COVID-19 as well as many other viruses, spores and bacteria, giving your customers and staff confidence that steps have been taken to reduce the risk of cross infection, increase biosecurity and help the battle against COVID-19.

Proven Technology – Features a unique delivery system used in hospital trucks to decontaminate vehicles and cages preventing cross contamination between dirty and clean laundry.

Speed – Decontaminates the equivalent of a single-story bus in ONLY 4 minutes! Delivers 1200ml of WELsan in 4 minutes sanitising up to 600m³.

Effective – WELsan falls on to surfaces, killing pathogens, viruses, spores and bacteria. The residual kill effect can last up to 2 weeks depending on traffic.

Unlike some other fogging products, the White Tiger system produces a fine mist using precision engineered spray nozzles. Units which generate an electrostatic charge to create a mist can damage sensitive devices such as communication equipment and computers.

Ideal for use in...

- Hospitals & GP Practices – waiting rooms, consultation areas...
- Schools – classrooms, communal areas, dinner halls...
- Veterinary Surgeries – operating rooms, reception...
- Dental Surgeries - waiting rooms, surgeries, decon room...
- Gyms – exercise areas, showers, changing rooms...
- Care Homes – bedrooms, communal areas...
- Airports and Aircraft (WELsan Solution approved by Boeing)...
- Trains, Busses, Taxis...
- Ambulances and patient transport vehicles...
- Lorries, cabs and cargo areas...
